

Hi, Im sending you this to let you know I have been listening for many years to Air1 sence it came to 90.1. My kids have grow up listening to this stantion too. The music they play is positive and clean. It helps you get though the day, keeping your mind on whats important in life. That Air 1 is there to help you get though the tuff times. This is the radio station we can get wholesome values and encouragement from. I have friends and other family members in this area that listen to Air 1 and would hate to lose it. This station is in the publics interest to provide a alturntive music to all that don't want to hear secular music. We should have the right to have this station avalible for our children in this community to chose to listen to it. Thank you for listening, Laura
